Power Supply

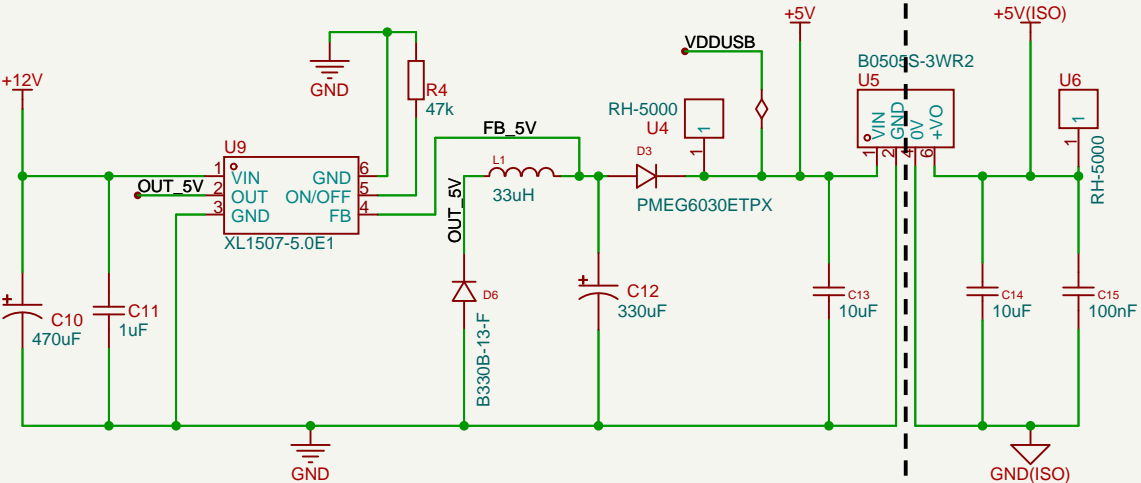

Buck Converter

Input : 15VDC - 36VDC
Output : 12V 5A

Buck Converter

Input : 12V 5A
Output : 5V 3A and Isolated 5V 3A

LDO

Input : 5V 3A
Output : 3.3V 2A

The image displays six circuit diagrams for digital input channels, labeled DI 1 through DI 6. Each diagram shows a similar topology:

- Input:** A digital input signal (DI_01 to DI_06) is connected to the input of an optocoupler (U35 to U40) via a 100 ohm resistor (R55 to R73).
- Supply:** A 3V3 supply is connected to the optocoupler's VCC pin (pin 4).
- Grounding:** A 10k pull-down resistor (R58 to R74) is connected from the input line to ground (GND).
- Optocoupler:** The optocoupler is an EL357N(B)(TA)-G (LTST-C170TBKT).
- Output:** The output of the optocoupler (pin 2) is connected to a 4.7k resistor (R53 to R70), which is then connected to a 5.08-2P-GN connector (CN8 to CN13).
- Internal Components:** Each circuit includes an internal LED (LED1 to LED6) and a diode (D27 to D32) connected to the output line.
